Hanging Guide

Oh my you must be so excited to receive your new painting. Let's get the information you need to hang it in your space.

All the paintings come pre-wired so I've got that part covered for you. What you will need are: a hammer, nail, measuring tape, and a piece of paper to make some notations.

If you are hanging your painting alone versus with other pieces.

1) The desired height is 58 inches from the floor. This will put it at a comfortable eye level for most viewers.

Here's where the note taking comes in. You want to measure from the top of the wire to the top of the frame. Mark that measurement down. Then measure the height of the art work and divide that in half. Then subtract the distance between the wire and the top of the frame. Put the nail at that height.

$$36'' / 2 = 18''$$

$$18'' - 3'' \text{ (distance from the wire to the top)} = 15''$$

58 " (ideal height) + 15" will give you the height of the nail placement.

Hanging in a grid

This takes some careful measuring but creates quite a nice arrangement.

- Centered on the wall.
